Security System

List of Services

Data Center Infrastructure

❖ The Data Center of QTSC (QTSC-IDC) is built, invested on modern Information Technology infrastructure:

- Using the newest application/technology: Cloud computing, Software defined network (SDN), MPLS/VPN, RPR/DPT... providing high, stable Information technology services to customers
- High redundancy, secret and security: Using security solutions from the well-known production providers: Checkpoint, Cisco, TrendMicro, Imperva, ArcSight, Radware...
- Human resources: long-time experience, using ISO 27001, ISO 9001 for operation and management.
- Agreeing to the Nation and Vietnam Standards:
 - TIA942 – Tier 3.
 - BS 5839 & TCVN 6160 (fire system).
 - ANSI/TIA/EIA-606A.

Data Center Infrastructure

❖ Data Center Location:

- QTSC-IDC is a separated building, far away residential areas.
- It is designed only for Data Center, located inside QTSC.
- It is protected, security

Data Center Infrastructure

❖ Standard of electric technology:

➤ Electric current:

- 4 input currents
- Undergrounding
- Ring connected
- The total electric power up to 40MW
- Provide electric to many transformer stations.

➤ Electric resource backing-up:

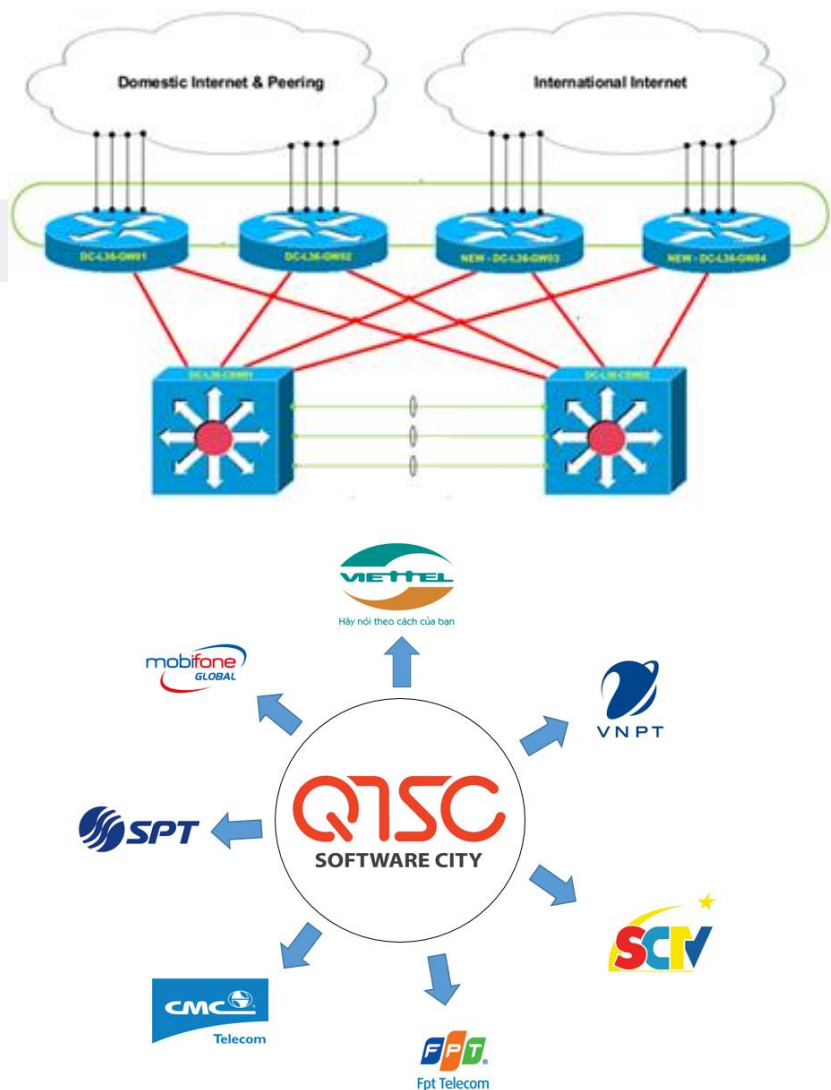

- 02 x UPS (N + 1) system
- 02 generators (1,200KVA/generator).

➤ Chilly system:

- Precision air-conditioners run by N+1 mode
- The temperature: $21^{\circ}\text{C} \pm 1^{\circ}\text{C}$
- Humidity: $\text{RH } 55\% \pm 5\%$

Data Center Infrastructure

- Internet connections

- Connecting by fiber optical cables directly to Vietnam's IXPs: VNPT, FPT, Viettel, CMC, SCTV, MobilefoneGlobal...
- Connecting only one hop to the International ISP PCCW, NTT, TATA...
- Bandwidth is provided for customers' need. It is upgraded and configured from QTSC network system rapidly.
- Supporting: routes optimization, guarantee the Service level agreement (SLA) for customers.

List of Services

Cloud Computing System

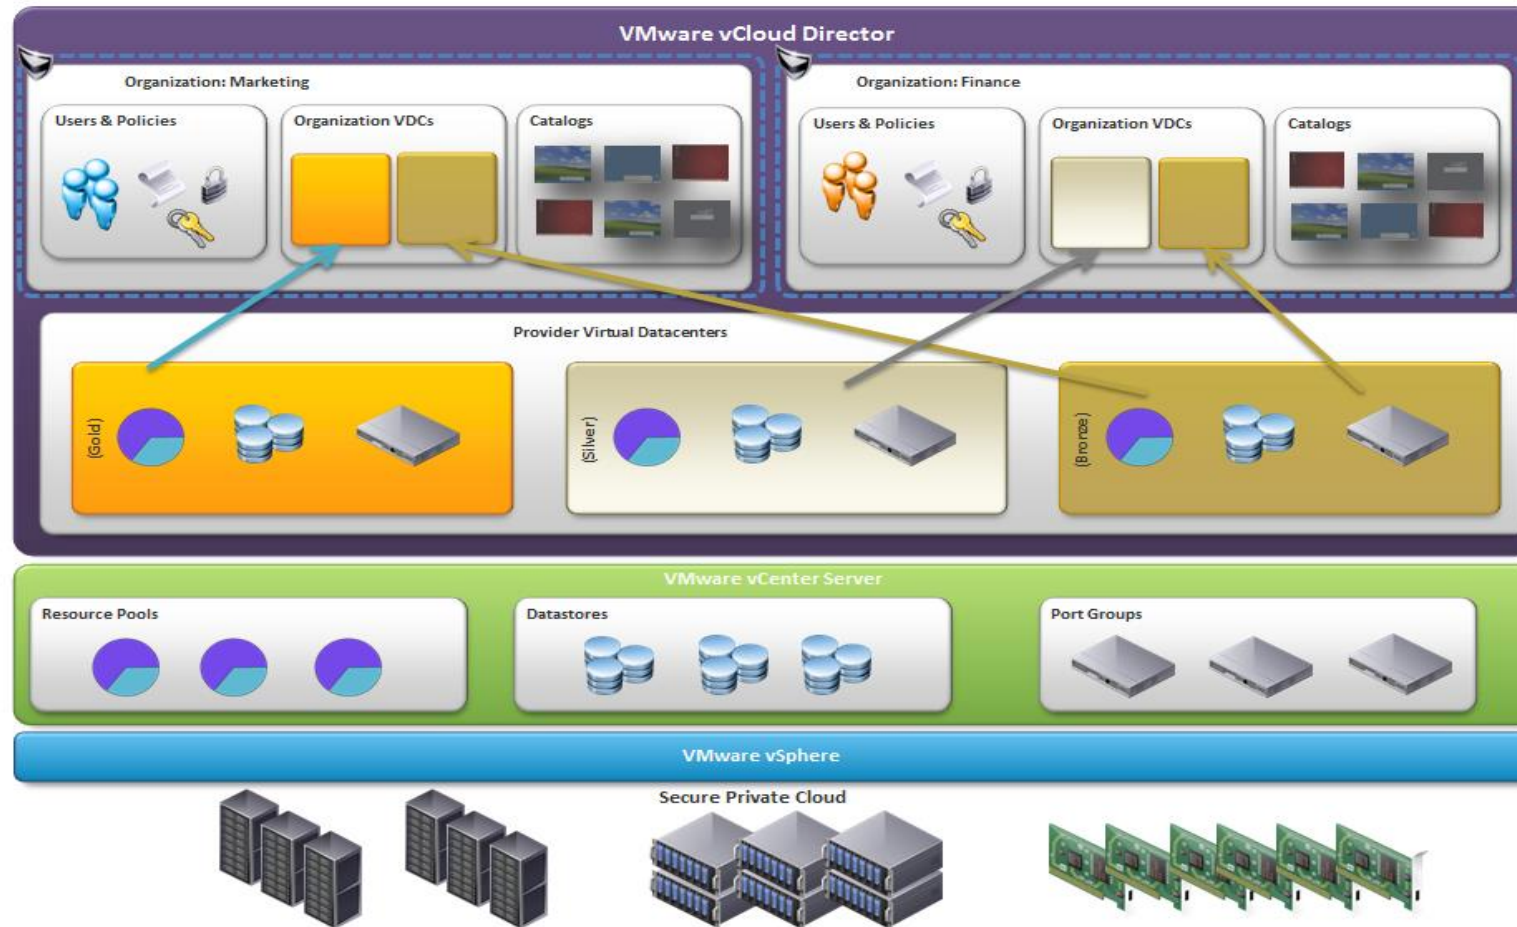

Cloud computing platform:

Designed into module architecture, this creates flexibility for the system, and is available to extend a system

- **Computing, data transfer modules:** using technological server of Cisco, IBM...
- **Storage, back-up modules:** using technological storage of NetApp, tape backing-up from IBM, Symantec.
- **Management, service providing, virtualization modules:** the parts service providing, virtualization, monitor and storage management are based on VMWare solution.
- **Security modules:** Multi-layer Firewall, Web Application Firewall (WAF), (IPS/IDS). Anti-virus, Anti-spam parts: used the high technology of the well-known producers: Checkpoint, Cisco, IBM, TrendMicro, ForeScout...

Cloud Computing System

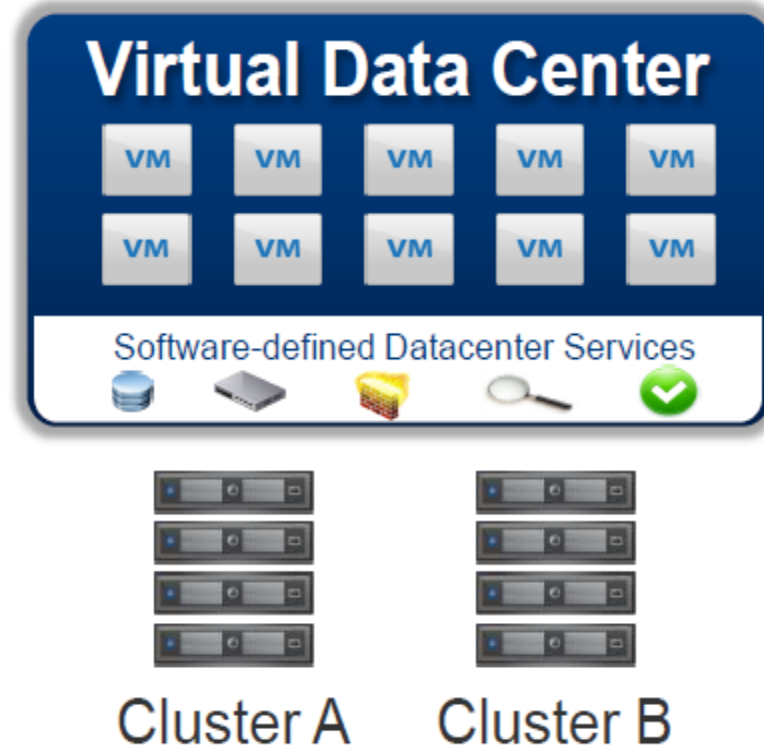

Computing system is held on vCloud platform, VMWare virtualization is based on virtual data center (vDC). It safe and secure

Cloud Computing System

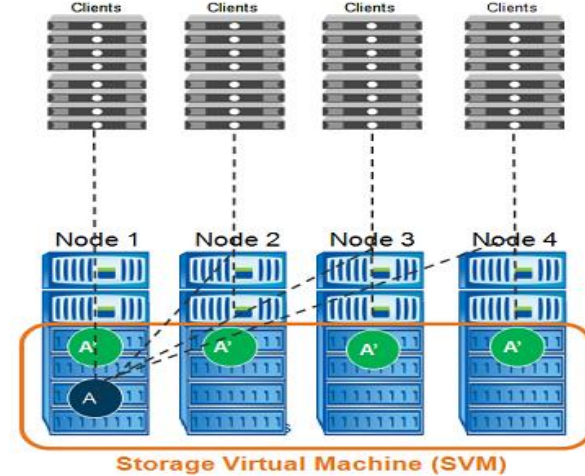

✓ Server Systems

- Using powerful physical servers producers: IBM, Cisco... These have power configuration (CPU, RAM)... to optimize computing resources.
- These are operated in the cluster mode which create high backing-up, availability for VMs if the physical servers get error.
- Each server has two 10Gbps ports for Internet connection. Also, It has two 16Gbps ports connected to SAN.
- SAN and SAN switch have parallel backing-up

Cloud Computing System

✓ Storage System

- SAN cluster have 04 controllers (nodes), running on DataONTAP 9.1 operating system.
- The controller supports NAS (2/10Gbps) and FC SAN (4/16Gbps).
- Providing multi-tenant model
- Can be extended space to thousands PB (petabyte).
- Data is moved flexibly between nodes.
- Support RAID 5
- Speed of controller is up to 80,000 IOPS
- Compressing, de-duplication supporting

List of Services

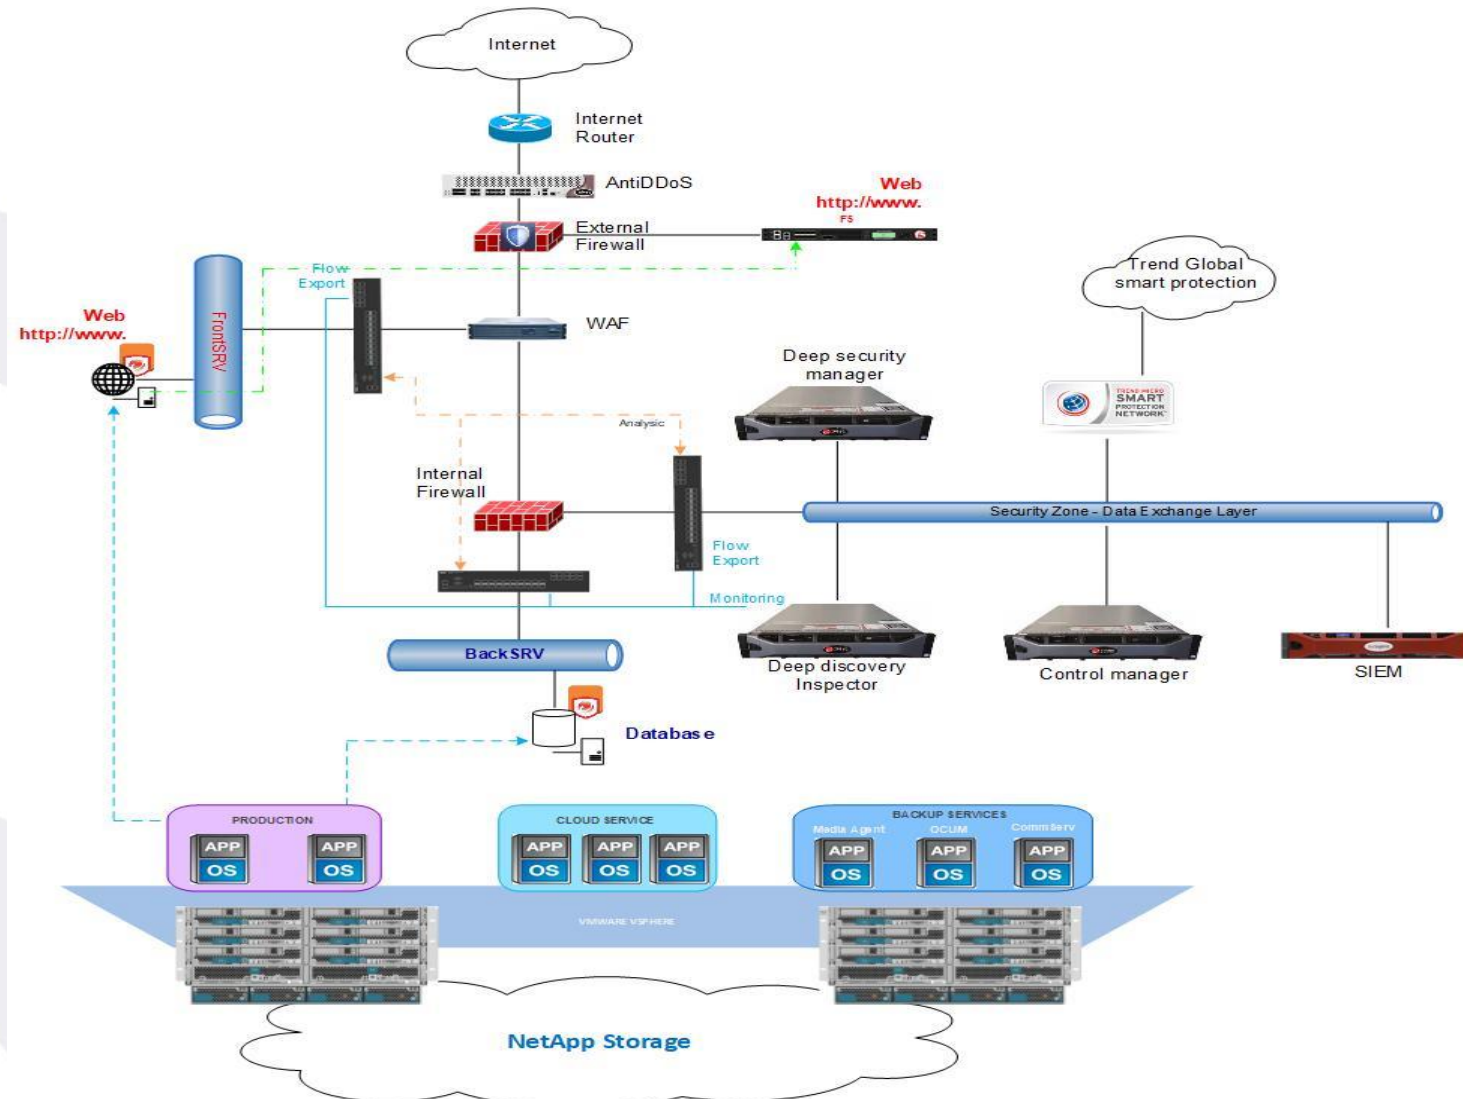

Security System

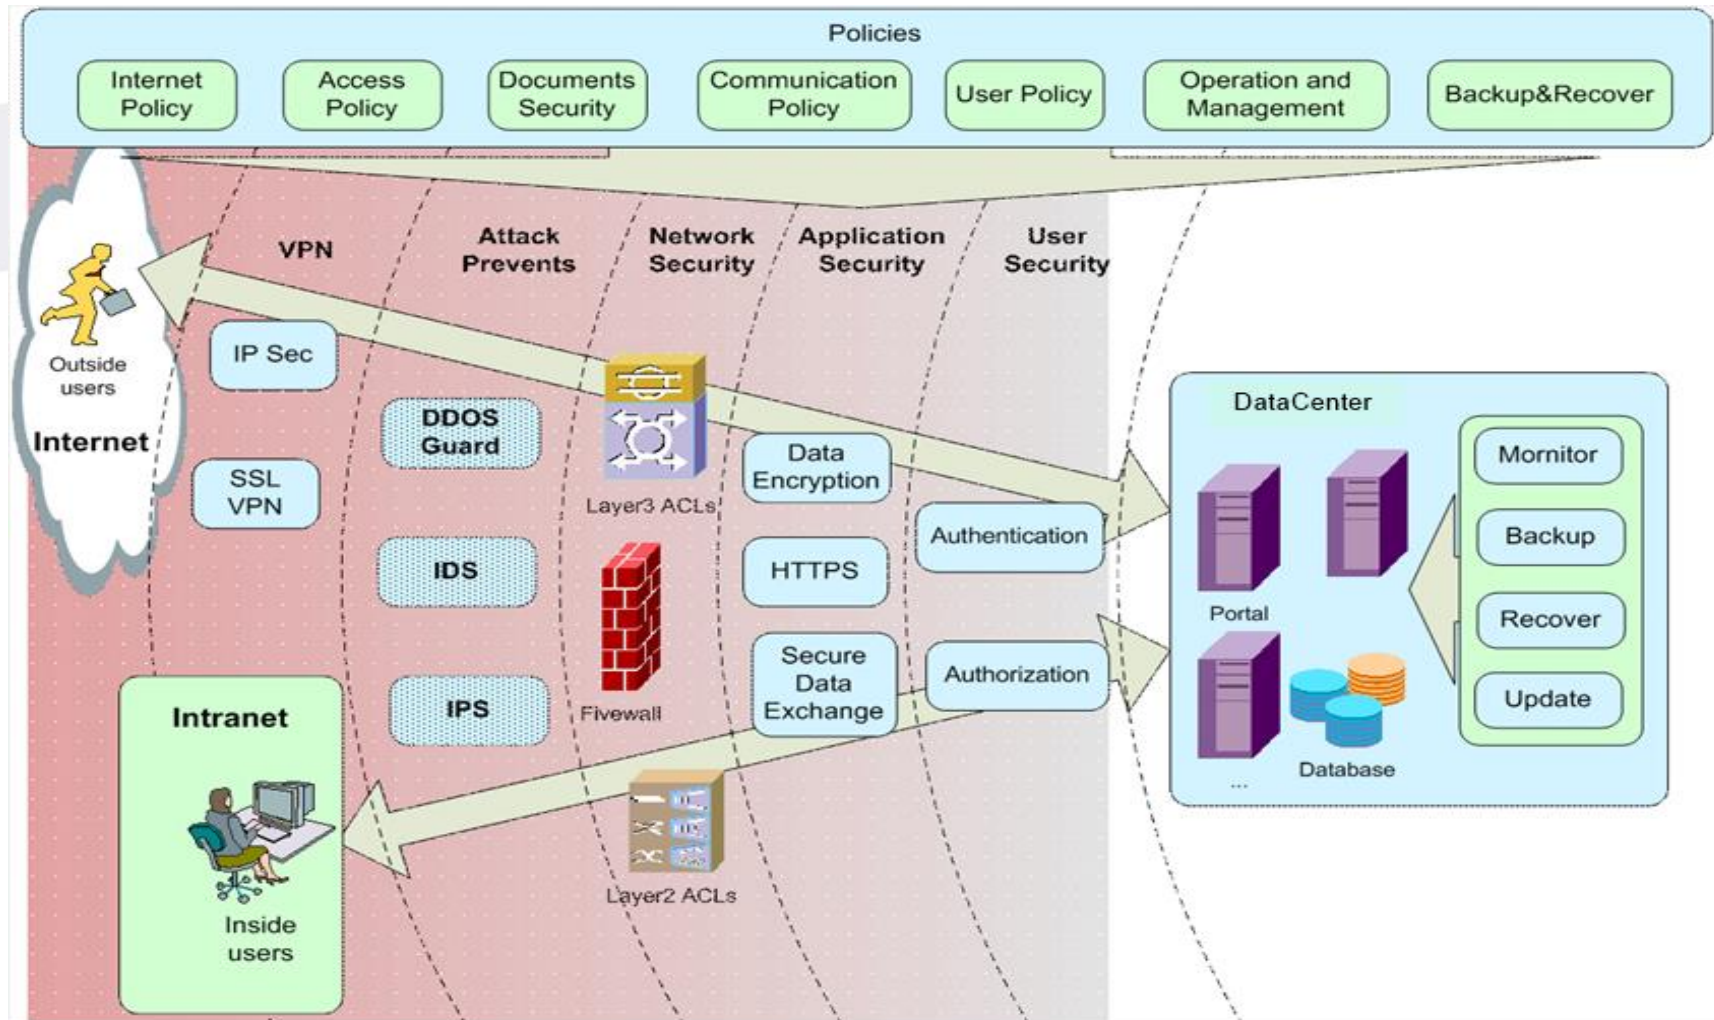

✓ **Security productions/Application:**

- Intrusion protection system (IPS).
- Multi-layer firewall.
- Web Application Firewall (WAF).
- Privileged Identity Management (PIM).
- Security Information and Event Management (SIEM).
- Antivirus system.
- Deep Discovery Inspector (DDI).
- VPN encrypted.

List of Services

List of Services

- **Internet Services:**

- Broadband Internet
- Leased line Internet

- **Cloud computing Services:**

- Cloud server
- Private cloud
- Backup & Restore

- **Datacenter Services:**

- Colocation Server
- Colocation Rack
- Private colocation space

List of Services

- **Security Services:**

- AntiDDOS
- IPS/IDS
- APT prevention
- Antivirus
- Multiplayer firewall
- Load balancing
- Web application firewall
- Early Monitoring and Warning
- SSL digital certificate
- Privilege password management

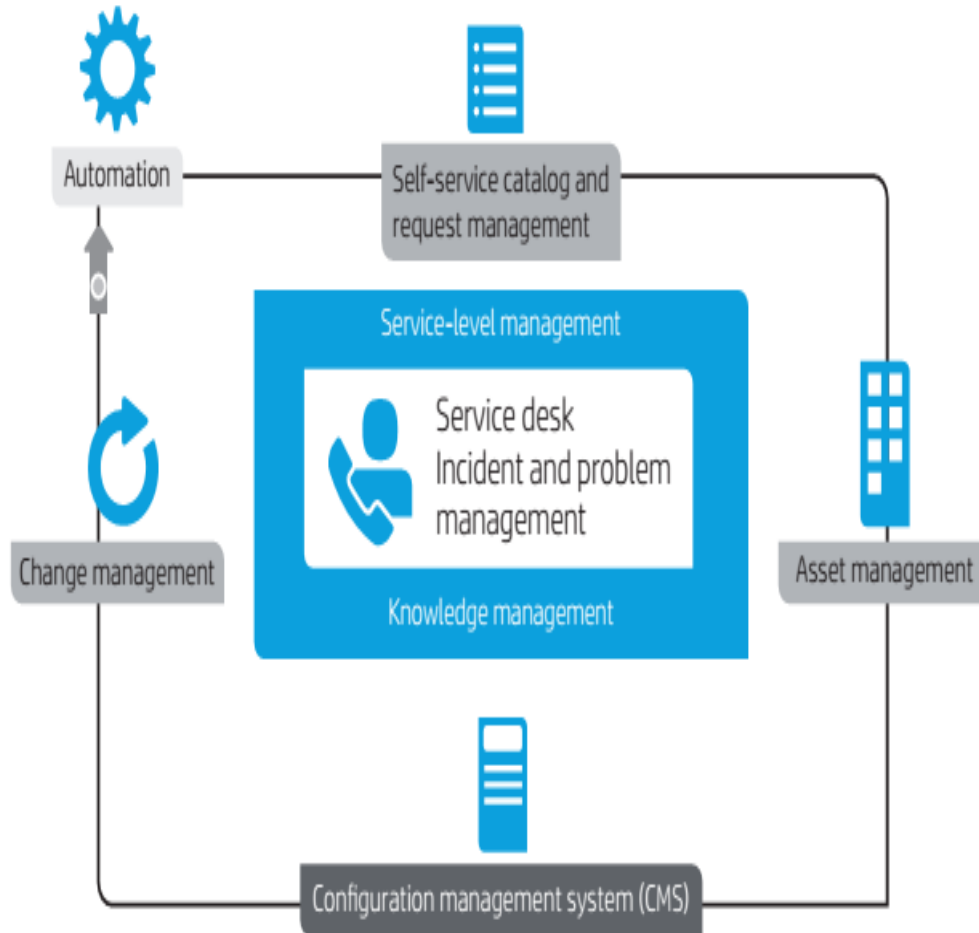

- **Other Services:**

- Mail server
- DR Site
- Data digitization service

Refer to: <https://telecom.qtsc.com.vn/>

Supporting Service

✓ Help-desk services:

- **Procedure management:**

- User requirement
- Error, problem
- Changing
- Property
- Customers
- Contract
-

Certification

Thank you!

THANK YOU!
