COMPANY PROFILE	"Vision: ""To provide scalable & IT Services & Solutions to satisfy client's business needs.""""Mission: ""To be the provider of information and Communication Technology services to design commerce, which deliver long term commercial benefits. The strategies evolved should be economical, efficient and flexible and allow the organization to respond rapidly to both market and customer needs. """

Any New IT Product to be launched

"EMR & HER (Description) A comprehensive EHR platform have an appointment-setting feature that allows team members to quickly register patients, schedule them, and choose a purpose for their visit. It must send out automatic appointment reminders via text or email to decrease no-shows and confirm better collections. However, you need to ensure that you are comfortable with the platform's scheduling features. The EMR platform should make it easy for users to quickly and expertly record and access patient history when required. That is, it should let providers capture, review, as well as manage medical procedural/surgical, family, and social history, including the relevant positive and negative accounts, patient-reported or externally available ."
