Internet

Data Center

Electricity System

2

Infrastructure services

- As for the power system, at QTSC, there are 3 direct power sources from the national power grid. If a power supply fails, there will be other power sources to replace it, without affecting business operations.
- In addition, each building is always arranged at least one generator for any unusual cases.
- And the electrical system at QTSC is a safe and aesthetic underground cable system. Businesses can completely feel secure when working here.
